| <p>Q1 Show the difference between RANK and DENSE_RANK on professor salaries — observe the gap behavior when salaries are tied.</p> |
| <p>Q2 For each student, show the GPA of the student enrolled immediately before and after them using LAG and LEAD, ordered by enroll_date.</p> |
| <p>Q3 Calculate a running total of scholarship amounts ordered by start_date.</p> |
| <p>Q4 Divide all students into 4 GPA quartiles ,Add a label for each quartile.</p> |
| <p>Q5 Show the first 3 characters of each course_code, and find the position of the first digit in it.</p> |
| <p>Q6 Create a function get_dept_student_count(dept_id) that returns the number of students in that department.</p> |
| <p>Q7 Create a function give_gpa_bonus(dept_id, bonus_percent) that returns a table of: student name, old_gpa, new_gpa — without actually updating any rows.</p> |
| <p>Q8 Create a stored procedure transfer_student(student_id, new_dept_id) that moves a student to a new department and confirms with RAISE NOTICE.</p> |
